PROFILE

Frontend Engineer with experience building scalable, responsive, and interactive web applications using React.js, TypeScript, Javascript and Next.js. Skilled in developing reusable UI components, integrating REST APIs, managing application state, and translating Figma designs into high-performing user interfaces. Passionate about writing clean, maintainable code and collaborating with cross-functional teams to deliver seamless user experiences. Comfortable using AI-assisted development tools to improve productivity, debugging, code quality, and development workflows.

PROFESSIONAL EXPERIENCE

Frontend Engineer, Fusion Intelligence Technologies Jan 2025 – Present | Lagos, Nigeria

- Developed scalable and reusable frontend components using React.js, TypeScript, JavaScript, and Tailwind CSS for responsive web applications.
- Collaborated with backend engineers to integrate APIs and third-party services while contributing to the development of a WhatsApp automation bot to streamline client communication and support workflows.
- Translated Figma UI/UX designs into fully functional, responsive web interfaces with pixel-accurate implementation and cross-device compatibility.
- Implemented frontend best practices including component reusability, clean architecture, Git-based version control, and maintainable code structures.
- Participated in debugging, performance optimization, and feature enhancement across multiple frontend projects.

Weekend Frontend Coding Instructor, Aishah Schools May 2026 – Present

- Teach frontend web development concepts including HTML, CSS, and JavaScript to children and teenagers.
- Guide students in building web pages, forms, and interactive web projects through hands-on lessons.
- Provide individualized support to learners with different skill levels.
- Review student work, track progress, and provide constructive feedback.
- Simplify technical concepts and encourage problem-solving through practical exercises.

Frontend Developer Intern, Axia Africa Jun 2024 – Dec 2024 | Lagos, Nigeria

- Communicated complex concepts clearly to diverse audiences, strengthening technical explanation and cross-functional communication skills.
- Demonstrated strong organization, adaptability, and analytical problem-solving in fast-paced collaborative environments.

TECHNICAL SKILLS

- Frontend** — React.js | Next.js | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | Shadcn UI
- State Management** — Redux Toolkit | React Context API | React Query
- Tools and Technologies** — Git/GitHub | NPM | Vite | REST API Integration | Supabase | React Testing Library
- Other** — Responsive Design | Accessibility | Problem Solving | Cross-functional Collaboration | AI-assisted Development Tools (ChatGPT, GitHub Copilot, Claude, Codex)

PROJECTS

- Lasu Alumni App

Designed and developed a web-based alumni management application for Lagos State University (LASU) to connect graduates, manage alumni records, and streamline communication.

~ **View Project:** <https://lasu-alumni.vercel.app/> 

~ **Source Code:** <https://github.com/Oreoluwa11/Lasu-Alumni> 

~ **Features:**

Responsive designs for mobile, tablet and desktop screens. | Navigation bar with a hover effects. | Smooth color transitions.

~ **Technologies Used:**

TypeScript | Tailwind CSS | Next.js | Supabase | React.js | PostgreSQL

- Bizflow – Budget Planning Web App

Built a responsive budget planning web application that enables users to track income and expenses efficiently. Focused on reusable component architecture, responsive design, and smooth user experience across devices.

~ **View Project:** <https://bizflow-gray.vercel.app/> 

~ **Source Code:** <https://github.com/Oreoluwa11/bizflow> 

~ **Features:**

Fully responsive across all screen sizes | Interactive navigation bar with hover effects | Smooth color transitions and UI animations | Grid-based layout for structured content organization

~ **Technologies Used:**

JavaScript | Typescript | Next.js | React.js | Tailwind CSS | Supabase

- Xplore App

Developed a restaurant discovery platform with dynamic search, filtering, and review functionality using Next.js App Router and TypeScript. Implemented dynamic routing, API-based data handling, URL state synchronization, and responsive UI optimization.

~ **View Project:** <https://xplore-app-eta.vercel.app/> 

~ **Source Code:** <https://github.com/Oreoluwa11/Xplore-app> 

~ **Features:**

Dynamic search with query-based filtering | Filter restaurants by location (Mainland / Island) | Dynamic route pages for individual restaurant details | API routes for restaurants, reviews, and comments | Average rating calculation logic | Responsive UI across mobile, tablet, and desktop | URL state synchronization using search parameters

~ **Technologies Used:**

JavaScript | Typescript | Next.js (App Router) | React.js | Tailwind CSS | JSON-based mock database

- Portfolio Web App

Designed and developed a personal portfolio website to display projects, technical skills, and background. Focused on responsive design, clean layout, and accessibility across devices.

~ **View Project:** <https://anoba-rahmat.vercel.app/> 

~ **Source Code:** <https://github.com/Oreoluwa11/My-Portfolio> 

~ **Features:**

Responsive designs for mobile, tablet and desktop screens. | Navigation bar with a hover effects. | Smooth color transitions.

~ **Technologies Used:**

JavaScript | Tailwind CSS | Next.js | Radix UI | React.js

EDUCATION

Bachelor of Science, Major: Computer Science (Bsc. Computer Science)

Lagos State University

Achievements:

~ Developer of The Year, National Association of Computer Science Students (LASU)
